1.Create a Bucket in IBM object:

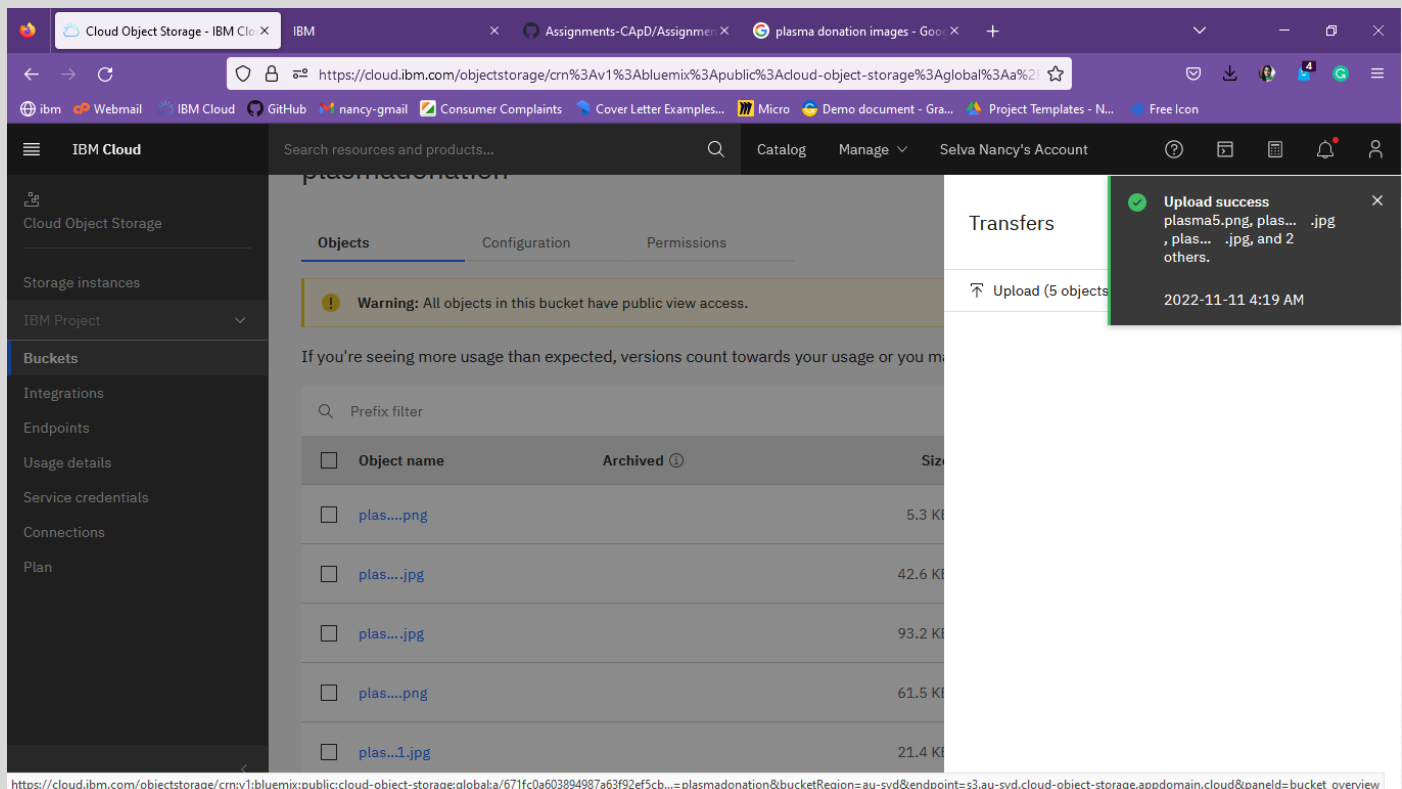

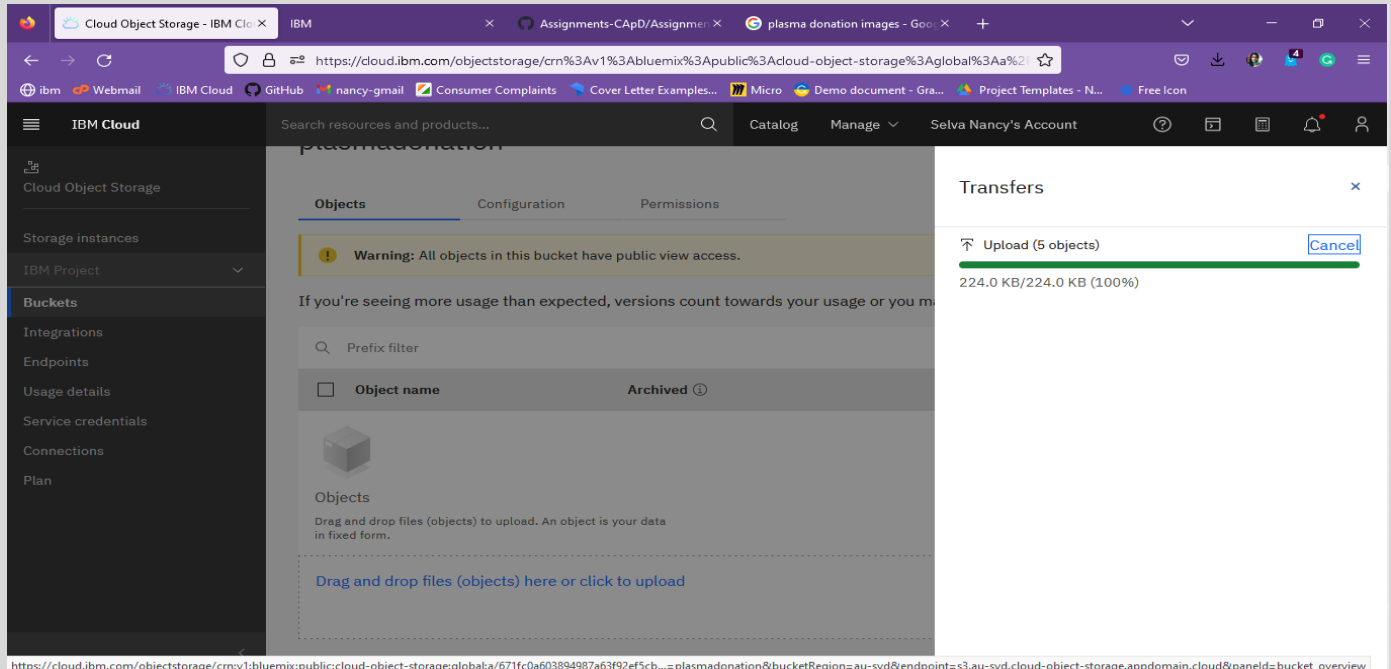

The screenshot displays the IBM Cloud Object Storage interface. The left sidebar shows the navigation menu with 'Buckets' selected. The main content area is titled 'Buckets' and includes a description: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table of existing buckets.

Name	Public access ⓘ	Location ⓘ	Storage class	Created
plasmadonation	Yes	au-syd	Smart Tier	2022-11-08 8:52 PM

A 'Create bucket' button with a plus icon is located in the top right corner of the bucket list area.

2. Upload 5 images to IBM object storage and make it public. Write html code to displaying all the 5 images:

```

<!DOCTYPE html>
<html>
<head> <style> img {   width:250px;
    height:250px;
}
</style>
</head>
<body>

<br>

<br>

<br>

<br>

<br>
</body>
</html>

```

3.Upload a CSS page to the object storage and use the same page in your HTML code:

The screenshot shows the IBM Cloud Object Storage console. The left sidebar contains navigation options: Cloud Object Storage, Storage instances, IBM Project, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main area displays a table of objects with columns for Object name, Archived status, Size, and Last modified. The table lists six files, including five PNG images and one CSS file named 'st...css'.

Object name	Archived	Size	Last modified
plas....png		5.3 KB	2022-11-11 4:17 AM
plas....jpg		42.6 KB	2022-11-11 4:17 AM
plas....jpg		93.2 KB	2022-11-11 4:17 AM
plas....png		61.5 KB	2022-11-11 4:17 AM
plas...1.jpg		21.4 KB	2022-11-11 4:17 AM
st...css		12.4 KB	2022-11-11 6:38 AM

Below the table, there is a dashed box with the text: "Drag and drop files (objects) here or click to upload".

```

DOCTYPE html>
<html>
<head>
  <link rel="stylesheet" href="https://s3.jp-tok.cloud-object-storage.appdomain.cloud/plasmadonation/ styles.css">
</head>
<body>

<br>

<br>

<br>

<br>

<br>
</body>
</html>

```

4.Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as an assignment.

5.Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page.

Solution:

```

<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta http-equiv="X-UA-Compatible" content="IE=edge" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>IBM Object Storage Demo</title>
    <link
      rel="stylesheet"
      href="https:// mahaleninanushine-first-demo.s3.sng01.cloud-object-storage.appdomain.cloud/style.css"
    />

    <script>      window.watsonAssistantChatOptions = {      integrationID: "b8b38143-a95d-44b4-84f6-eef3ebb479f5", // The ID of this integration.      region: "au-syd", // The region your integration is hosted in.      serviceInstanceID: "d05024f0-2dbf-4ca1-9961-dc3402b37937", // The ID of your service instance.

```

```

        onLoad: function (instance) {
            instance.render();
        },
    };
    setTimeout(function () {
        const t = document.createElement("script");
        t.src =
            "https://web-chat.global.assistant.watson.appdomain.cloud/versions/" +
            (window.watsonAssistantChatOptions.clientVersion || "latest") +
            "/WatsonAssistantChatEntry.js";
        document.head.appendChild(t);
    });
</script>
</head>
<body>
    <h1>Assignment 3</h1>
    <ol>
        <li>Create a Bucket in IBM object storage.</li>
        <li>
            Upload an 5 images to ibm object storage and make it public. write
            code to displaying all the 5 images.
        </li>
        <li>
            Upload a css page to the object storage and use the same page in your
            code.
        </li>
        <li>
            Design a chatbot using IBM Watson assistant for hospital. Ex: User
            comes with query to know the branches for that hospital in your city.
            Submit the web URL of that chat bot as a assignment.
        </li>
        <li>
            Create Watson assistant service with 10 steps and use 3 conditions in
            it.
            Load that script in HTML page.
        </li>
    </ol>
    <div class="container">
        
        
        
        
        
    </div>
</body>
</html>

```

OUTPUT:
